

# SORTLINK<sup>TM</sup>

Automatic Cop-sorting system for winding

The complete process of Sorting Bobbins ( at auto winding) is automated.

Potential to Save 12 to 24 men /day in a 25000 spindle mills with 8 or 9 auto winders.

Pays back within 3 years in most cases.

- Segregates bobbins with remnant yarn - half and full bobbin for re-circulation to winding ( bin 1 )  
- with only few layers of yarn for removal into ( bin 4 )
- Sorts bobbin of 2 two colours - (bin 2 & 3)

## SORTLINK in two optional models

### CRATE MANAGER

- Sorted
- Aligned ( base / tip ) and
- Counted set of bobbins ( as per doffer work load ) to Ring frames with manual doffing.
- Space to store 10 empty crates and 10 filling in crates. Filled crate automatically moves out in Queue. The only manual function is to replenish empty crates.

### TROLLEY SYSTEM

- Sorted bobbins in Trolley for directly loading to Ring Frames with Auto doffer
